

I submit the following budget rates to move skidded storage units from Yorkton.

1. To Saskatoon- \$6200.00 each plus GST
2. To Regina- \$4600.00 each plus GST

Please Note:

*All permits, pilot cars, and fuel surcharge are included where applicable. Two pilot cars are required to move each unit down the highway.

*The rates are based on the weights and dimensions provided. (60' long, 20' wide, 11' high) Changes in this information could result in adjustments accordingly.

*Rates are not valid on percentage-banned roadways.

*If delivery is required in city limits of either location, we may have to get police escorts. This can only be confirmed after an actual delivery address is confirmed. Any cost incurred for this service is extra at cost plus 15%

*The rate includes a winch truck and a trombone step deck trailer. The front of the units have to be lifted 39" in the air so we can get a live roll under the front to load. Then we can winch them onto the trailer. The seller has recommended equipment be on site to help the back end when it is over centering onto the trailer. The cost for loading including the loader to assist is included in the above rates. We will require the buyer to supply a loader or suitable size forklift to perform the reverse of this procedure for unloading, this cost is not included.

*I have used routing past experience would suggest is suitable however it is impossible to predict restrictions due to weather, construction, etc. Rates are subject to routing approval from all jurisdictions involved.

*The load site, unload site, and the access roads to them must be suitable with respect to corners, ground stability, ground clearance, overhead encumbrances and physical space to safely maneuver when considering the overall width and wheel base of the hauling configuration required.

*Terms are 100% payment COD.

The above rates should be used as a guide only. For exact pricing and to discuss the exact loading and unloading procedure and requirements I would strongly suggest any interested buyers to contact me direct for firm pricing to be sure there are no surprises for any parties involved.

Please call if there are any questions.

Thank you very much.

*Regards,
Harvey McClelland*
